9		~40 sq. ft.	2" Fiberglass insulation, 20 sq. ft. of R13, split in half

* QUANTITY WITHOUT INSULATION

** QUANTITY WITH INSULATION

Tools Required: This simple project can be completed with a hammer and a circular saw. The use of a miter chop saw or table saw will only make the cutting easier and more accurate. The use of a straight fence board (choose the straightest furring strip) clamped to the plywood will make the cuts with a circular saw straighter.
